

Arctic Cyber Link and Pearson Metal Inc.

**Cloud Operations and
On-Prem managed
services.**

**Arctic Cyber Link
helped move
Pearson Metal's IT
infrastructure to the
cloud with
confidence and
minimal downtime.**

ARCTIC CYBER LINK

THE CLIENT

INDUSTRY: Structural Engineering

TEAM SIZE: 10-30

LOCATION: Peel Region, Ontario

THE SITUATION

- Engineering team were having issues with slow email service, and issues connecting email to their phones.
- Inboxes were constantly filling up and users spending much of the time clearing up emails than working on projects.
- No centralized file system, power users often edits and saves work on local machines with no backup solution.
- No security solutions in place, the company has no measures to defend against ransomware attacks or targeted phishing attacks.

THE SOLUTION

Over a 3 month period, Arctic Cyber Link migrated Pearson Metal's email service to Microsoft 365 Exchange, fully onboarding the team to use Outlook, greatly increasing productivity.

We joined all users to a single domain, setting up a centralized on-site file server with onsite and offsite backup, implementing access control for different departments. New firewalls and antivirus solutions has been implemented greatly increase cybersecurity posture.
